SUMMARY

IT Business Analyst with hands-on delivery experience on a public-university tuition/payment system integrated with BIDV, a real-estate ERP/CRM booking platform, and a multi-tenant AI sales-training product. Strong in requirements specification, process/system modeling, API integration analysis, backlog prioritization, and functional testing/UAT. Final-year Management Information Systems student at VNU International School (GPA 3.59/4.00).

EXPERIENCE

Tinktalk **Mar 2026 – Sep 2026**

Business Analyst *AI Product & Client Project Delivery*

ULIS Tuition Management & Online Payment System – BA/PO *Jun 2026 – Sep 2026*

- Managed the backlog, MVP scope, and acceptance criteria in **Jira** for a public-university tuition/payment system serving about **8,000 students**, with a projected peak of about **1,600 transactions/day**.
- Authored and maintained a versioned **SRS (ISO/IEC/IEEE 29148)** of **181 requirements** across **7 business modules**, including user stories, use cases, business rules, data/state models, and traceability; specified a **tuition rule engine** with per-credit, per-course, and fixed-term calculation plus rule-selection precedence.
- Specified **integration flows between the OneVNU portal, the tuition platform, and BIDV**: bill inquiry/payment APIs, data/state mapping, QR/OTP flows, idempotency, payment locking, timeout/retry handling, duplicate-payment prevention, and end-of-day reconciliation.
- Built a **61-case functional/UAT test plan** and consolidated a **90-item defect log**; coordinated **successful UAT with BIDV and the Digital University Administration Center**, maintained a decision and open-issue log across ULIS, BIDV, and technical teams, and supported production-environment preparation for go-live.
- Designed and validated a **13-screen role-based admin mockup**, then performed UI/UX acceptance review of implemented screens; flagged inconsistent status/debt terminology and a missing manual-payment flow for non-BIDV transactions.

Core Product – Tinktalk AI Sales Training Platform *Mar 2026 – Sep 2026*

- Clarified business rules, permissions, scoring behavior, UX flows, and edge cases for **2 applications** (Learner and Admin) and **4 role types** of a multi-tenant AI sales-training platform spanning voice roleplay, camera-based presentations, and multi-agent scoring.
- Authored and maintained **SRS and BRD** for product and client-specific requirements; supported rollout for external deployments including **a major Vietnamese commercial bank** and the **iStartup pitching-training program**, validating delivered features through functional and regression testing and tracking issues to verified fixes.
- Wrote and maintained **learner/admin user guides and product documentation** to support onboarding, training, and handover for external users.

S-Tech Technology JSC **Dec 2025 – Mar 2026**

Business Analyst Intern *RealERP / Booking Online System – Dat Xanh Mien Bac*

- Analyzed and validated **8 documented business workflows**, including unit locking, reservation/deposit, reservation-to-deposit conversion, allocation, sales-table flows, grouped booking, extension, and payment scenarios across multiple business roles.
- Reviewed cross-system business logic and state transitions between **RealERP/Back-office and CRM/Tavico**, covering **19 contract states**, role permissions, notifications, and payment synchronization.
- Executed about **80 functional and regression test cases** across core booking and payment workflows; documented defects, tracked fixes with Development, and verified corrected behavior before closure.

Our Homestay and Studio **Jan 2024 – Mar 2026**

Operations & Process Improvement Lead *Hanoi*

- Standardized operating processes across **5 locations and 40 apartments**, developing SOPs, control checklists, and Excel/Google Sheets KPI dashboards for occupancy and service operations.
- Reduced guest waiting time by about **20%** through process redesign, clearer responsibilities, and standardized procedures.

SELECTED PROJECTS

Sales Management System for a Shopee Marketplace Seller **Nov 2025 – Dec 2025**
Team Leader | Enterprise Information Systems Project

- Led analysis and system design for an end-to-end Shopee seller workflow across **6 swimlanes**, covering order import, sales confirmation, inventory reservation, warehouse fulfillment, logistics, returns, payout reconciliation, and management reporting.
- Translated business processes into an **REA model, ERD, relational schema, and MySQL implementation**; defined SQL queries/stored procedures and **6 database triggers** enforcing stock, reservation, return-restocking, and order-status rules.

GAG – Real-time Gender & Age Group Classification **Jun 2025**
Team Leader & Lead Developer | ResNet50, TensorFlow, Python

- Led the project and implemented the **end-to-end technical pipeline**, including web-based data collection/curation of **8,240 Vietnamese facial images**, preprocessing, model training, evaluation, and application integration.
- Built a multi-task **ResNet50-based computer vision system** with image upload, **real-time webcam input, and multi-face detection**; achieved **89.4% validation accuracy for gender** and **87.5% for age-group classification**.

CRM Solution Design – Cocoon Vietnam (Case Study) **Nov 2025 – Jan 2026**
Team Leader | Management Information Systems Project

- Led requirements analysis for a HubSpot-based CRM across **Marketing, Sales, and Customer Service**, mapping AS-IS/TO-BE workflows for customer segmentation, sales pipeline, and service tickets.
- Designed the CRM data model around **Contacts, Companies, Deals, Tickets, and Activities**; produced a **BRD** with WBS, RACI, risk register, KPI framework, and functional test cases.

EDUCATION

VNU International School – Vietnam National University, Hanoi **2023 – 2027**
B.Sc. in Management Information Systems *GPA: **3.59/4.00***

- Academic Encouragement Scholarship (**3 semesters**).
- Undergraduate Research: *The Role and Mechanism of Digital Transformation in Promoting ESG Practices among Small and Medium-Sized Enterprises (SMEs) in Hanoi.*

SKILLS

Business Analysis: Requirements elicitation & analysis, SRS/BRD, functional/non-functional requirements, user stories, use cases, acceptance criteria, business rules, backlog & MVP prioritization, mockups/wireframes, requirement traceability

Process & System Analysis: BPMN, AS-IS/TO-BE flows, user flows, state-transition modeling, ERD, relational schema, data mapping, role/permission analysis

Delivery & Testing: Agile/Scrum, test planning, functional/regression testing, UAT, defect tracking, change management, documentation, user guides & handover

Technical: Basic SQL/MySQL, relational databases, REST API integration, payment/reconciliation flows, data modeling

Tools: Jira, Figma, Draw.io, Microsoft Visio, Excel, PowerPoint, Google Sheets, Git/GitHub, ChatGPT, Claude

CERTIFICATIONS

Microsoft Business Analyst Professional Certificate 2026
Aptis ESOL Certificate – CEFR B2 2023
